

**zero**mission

## Jobmeal Finland

Hereby offset for greenhouse gas emissions corresponding to **342 tonnes CO<sub>2</sub>e**, from business related activities in 2018.

The offsetting occurs in the project CommuiTree Carbon Project in Nicaragua and is run in collaboration with small-scale farmers that plant trees in agroforestry systems. The project is certified in accordance with the Plan Vivo standard and delivers social and ecological co-benefits for participating communities and small-scale famers.
